

detail::object_api< handle >

handle

object

none

```
graph BT; none --> object; object --> handle; handle --> detail["detail::object_api< handle >"]
```

The diagram illustrates a vertical hierarchy of four components, each enclosed in a rectangular box. From bottom to top, the boxes are labeled 'none', 'object', 'handle', and 'detail::object_api< handle >'. Vertical arrows point upwards from 'none' to 'object', from 'object' to 'handle', and from 'handle' to 'detail::object_api< handle >', indicating a flow or dependency from the base 'none' up to the specific API detail.
